Finding the best team in Pokemon

Most people are familiar with the turn based battles in Pokemon and the importance of and uncertainty in selecting a team.

The goal of this project is to take data regarding all the Pokemons in a game and use this to find the best team and set of moves. This project is very open and the student can shape which questions are of interest.

Requirements:
Prior experience and a strong interest in data analysis and optimisation is recommended. Creativity and experience with programming are advantageous.
